

GIREESHA R

Senior Frontend Developer | Angular Developer | Web Developer

Hosur, Tamil Nadu, India | +91 7358529368 | gireeshafed@gmail.com

PROFESSIONAL SUMMARY

Frontend / Angular / Web Developer with 4.8 years of experience building scalable, maintainable, and responsive web applications using Angular (up to v20), TypeScript, RxJS, NgRx, and Node.js. Hands-on with modern Angular including Signals and standalone components. Architected shared platform infrastructure including monorepo restructuring, dynamic theming, and reusable component libraries for a multi-country insurance platform, contributing to a 30% reduction in policy administration costs. Experienced writing unit tests (Jasmine/Karma), managing builds with npm and Angular CLI, and collaborating directly with UX/UI designers to translate wireframes into production-ready interfaces. Leads and mentors a team of 4 developers, driving frontend architecture decisions for enterprise applications delivered across Kenya and Malawi.

TECHNICAL SKILLS

- **Languages & Core:** JavaScript, TypeScript, HTML5, CSS3, SASS, Node.js
- **Frameworks / Libraries:** Angular (up to v20), Angular Signals, Standalone Components, Angular Material, Bootstrap, RxJS, NgRx
- **Architecture:** Monorepo design, shared component libraries, dynamic theming systems, state management (NgRx: Store, Reducers, Effects), responsive design, cross-browser compatibility
- **Testing:** Unit and integration testing with Jasmine and Karma
- **Build & Package Tools:** npm, Angular CLI, Webpack
- **API Integration:** RESTful APIs
- **Version Control & CI/CD:** Git, GitHub, GitLab, Bitbucket, GitHub Actions, Azure DevOps
- **Collaboration:** Working directly with UX/UI designers to implement wireframes and mockups; Agile/Scrum ceremonies
- **Tools:** Visual Studio Code, FileZilla, Source Tree, Jira/Sprint
- **Leadership:** Team leadership, mentoring, code reviews

PROFESSIONAL EXPERIENCE

Frontend Developer / Angular Developer | *Swiftant IT Solutions*

Hosur, Tamil Nadu | January 2022 - Present

- Delivered frontend engineering for Afrisure, SwiftAnt's Azure-based insurance platform serving the Kenyan and Malawian markets, digitizing motor certificate issuance (DMVIC) and claims automation, contributing to a 30% reduction in policy administration costs and a 20% drop in claims ratio industry-wide.
- Consolidated previously separate B2B and B2C project repositories into a single monorepo, reducing code duplication and simplifying cross-project maintenance and releases.
- Engineered a centralized theme-configuration system pulled dynamically from Azure, enabling instant style and logo updates across all client applications from a single source instead of manual per-app changes.
- Led and mentored a team of 4 junior developers, conducting code reviews that raised overall team code quality and cut new hire onboarding time.
- Built a shared, custom Angular component library for navigation menus, allowing a single update to propagate automatically across every project in the platform.
- Architected state management using RxJS and NgRx, improving data flow consistency across large-scale, responsive applications.
- Redesigned authentication and session-state handling, replacing local-storage-based token management with NgRx (Store, Reducers, Effects) to deliver a more secure and predictable application state.
- Migrated legacy template-driven forms to Reactive Forms across the Afrisure platform in a 2-week initiative, cutting form validation bugs and simplifying validation logic, debuggability, and page performance.
- Partnered directly with UX/UI designers to translate wireframes and mockups into responsive, pixel-accurate Angular components across 6+ client-facing platforms.

- Authored unit and integration tests with Jasmine and Karma, validating component logic and reducing regressions introduced during platform migrations.
- Integrated RESTful APIs across multiple insurance platforms, ensuring reliable, real-time data exchange with backend systems.
- Optimized npm dependencies and Angular CLI build configurations, reducing bundle size and improving build performance across projects.
- Managed source control and release workflows using Git, GitHub, and GitLab, including branching, pull requests, code reviews, and merges, alongside Azure DevOps CI/CD pipelines.
- Shipped frontend features across 6 insurance platforms, including: CRA (claims management system), Nyala (integration with Hollard Insurance), Patabima (motor insurance marketplace for the Insurance Association), IAM Malawi (member company insurance platform), DMVIC V7 (claims management for association and member companies), and Core Afrisure (configurable insurance product development).

EDUCATION

Bachelor of Engineering, Electronics and Communication

Adhiyamaan College of Engineering, Hosur, Tamil Nadu | 2015 - 2019 | CGPA: 7.2

LANGUAGES

English, Tamil, Telugu, Kannada
